- 2 e-puck Roboter Komponenten Logik
- Komponenten

### Komponenten des e-puck Roboter

### Komponenten des e-puck Roboter

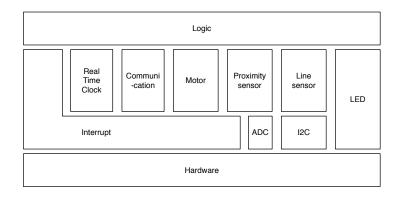

#### Interrupt: Ein- Ausschalten von Interrupts

hal\_int.h, hal\_int.c, hal\_int\_types.h

### Komponenten des e-puck Roboter

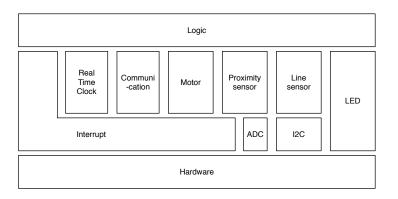

#### Real Time Clock: Auslösen von Interrupts; Callbacks

hal\_rtc.h, hal\_rtc.c, hal\_rtc\_types.h

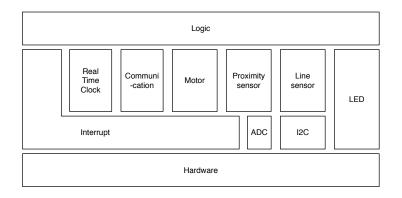

### Komponenten des e-puck Roboter

**Communication**: Verwaltung von Bluetooth-Verbindungen; Senden, Empfangen

hal\_uart1.h, hal\_uart1.c, hal\_uart\_types.h

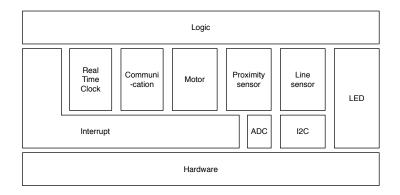

### Komponenten des e-puck Roboter

Motor: Funktionen für "High-Level"-Steuerung der Motoren hal\_motor.h, hal\_motor.c, hal\_motor\_types.h

### Komponenten des e-puck Roboter

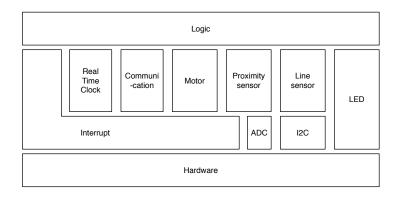

#### ADC: Funktionen für Analog-Digital-Wandler

hal\_adc.h, hal\_adc.c, hal\_adc\_types.h

### Komponenten des e-puck Roboter

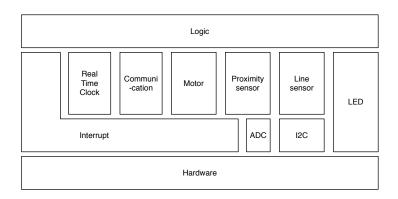

#### I2C: Funktionen für I2C-Modul

hal\_i2c.h, hal\_i2c.c

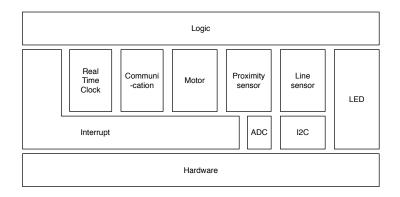

### Komponenten des e-puck Roboter

# **Proximity Sensor**: Initialisierung und Auslesen der IR-Sensoren

sen\_prox.h, sen\_prox.c, sen\_prox\_types.h

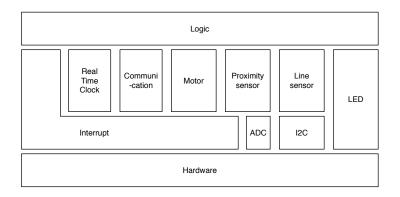

### Komponenten des e-puck Roboter

**Line Sensor**: Auslesen der Sensordaten aus dem I2C-Bus sen\_line.h, sen\_line.c, sen\_line\_types.h

### Komponenten des e-puck Roboter

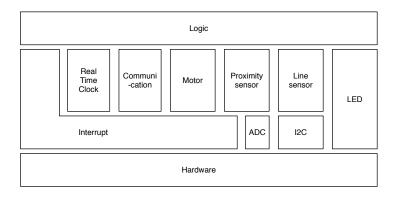

#### LED: Initialisierung, Steuerung der LEDs

hal\_led.h, hal\_led.c

### Komponenten des e-puck Roboter

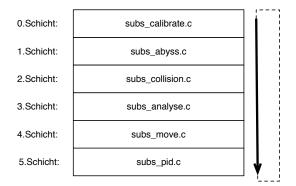

**Logic**: Subsumption...

0.Schicht:	subs_calibrate.c	İ	
1.Schicht:	subs_abyss.c		
2.Schicht:	subs_collision.c		
3.Schicht:	subs_analyse.c		
4.Schicht:	subs_move.c		
5.Schicht:	subs_pid.c	\	,
		'	

#### **0. Schicht**: Kalibriervorgang

subs calibrate.h, subs calibrate.c

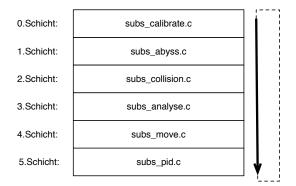

#### 1. Schicht: Abgrunderkennung

subs abyss.h, subs abyss.c

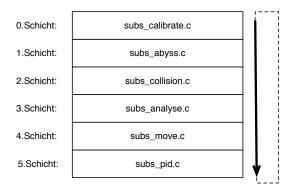

#### 2. Schicht: Kollisionserkennung

subs collision.h, subs collision.c

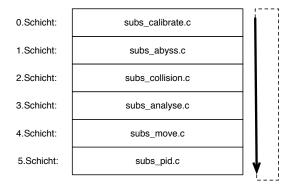

#### 3. Schicht: Knotenanalyse

subs analyse.h, subs analyse.c

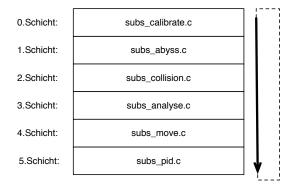

#### 4. Schicht: Bewegungsmodifikation

subs move.h, subs move.c

#### 5. Schicht: Linienvervolgung subs pid.h, subs pid.c
